

DON'T FEAR THE FREEZE

Four layers of winterizing protection. One solution.

Q360+

The Best Water Valve Deserves a Guardian

BLUE SQUARE

DON'T FEAR THE FREEZE

Four layers of winterizing protection. One solution.

FINALLY, A WINTERIZING SOLUTION WITH PEACE OF MIND

4 Layers of Sealing Protection, One Solution.

Nothing Protects Like A Guardian

How do you know your winterizing plug is holding pressure?

The answer: you don't. Unless you use the Guardian Winterizing Solution by Blue Square Manufacturing.

The Guardian delivers 4 layers of winterizing protection in one easy-to-use unit. Exclusively designed for the Ultra Efficient Q360+ Water Valve. Now the best in-floor system has the best in winterizing technology.

MULTI-LAYER PROTECTION

Protection Layer 1: 6 Deep Zone Plugs

These airtight locks are engineered with the kind of strength and reliability for your extreme winter conditions.

Protection Layer 2: 6 Exterior Zone Seals

Horseshoe-shaped seals to provide a secondary line of protection in the event of any kind of pressure drop inside the pipe.

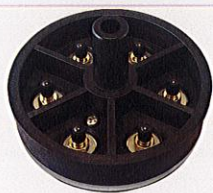

Protection Layer 3: (1) Perimeter Seal

This third level of protection ensures all 6 zones remain safely sealed.

Protection Layer 4: (1) Weather Protection Hood

This barrier of protection keeps a consistent downward pressure on all 3 of the Guardian's layers of protection and keeps rain and snow from filling the Q360+ Valve Cavity.

THIS

1 unit seals all
6 zones 3 times

NOT THIS

6 loose plugs
only 1 seal per zone
