ULTRALITE® LIGHTWEIGHT CONCRETE EQUIPMENT PADS

3" UltraLite® Pads

A true concrete equipment pad at the weight of plastic (about 2.5 lbs. per square foot). UltraLite® is strengthened by miles of fiber in each square foot of fiber-cement coating. This fiber allows the pad to flex instead of cracking or breaking. The textured surface prevents the condensing unit or portable generator from sliding, and allows water drainage, while the engineered expanded polystyrene (EPS) core prevents warping and provides a solid bottom to resist settling. Unaffected by soil conditions, ultraviolet (UV) light, temperature extremes, and other weather conditions.

THE HURRICANE PAD™ CONCRETE EQUIPMENT PADS

The Hurricane Pad™

Designed specifically for the hurricane prone regions of Florida and the Gulf Coast, The Hurricane Pad™ meets stringent local code requirements for wind resistance. Heavier than a normal concrete pad, this 4" pad provides sufficient weight to meet code. The Hurricane Pad meets the Florida Building Code Notice and can withstand winds up to 150 MPH. For certain taller equipment, The Hurricane T Class Pad™ is needed. Due to their extra weight, standard freight terms only apply for shipments to Florida. All other shipments are shipped FOB Conyers, GA.
